

Tiny
hands
big feats

Respect each child's uniqueness | Nurture a child as a whole being | Create a happy and peaceful citizen

The most popular festival among children, Halloween Day, was celebrated at Diversity with great enthusiasm and fervour.

Priceless Relationship Friendship.....

It is said that the friends whom you have made in your childhood know you better than you.

Epicurus, on choosing people over fortune has said, "Of all the things that wisdom provides to help one live one's entire life in happiness, the greatest by far is the possession of friendship."

Diversity propagates Social-Emotional learning like any other subjects. Friends make it easy for them.

Hand Skills

Brain conceptualizes ideas but hands execute them.

Do you know the opposable thumb in our limbs has contributed unprecedently in making humans creative, distinct, and extraordinary.

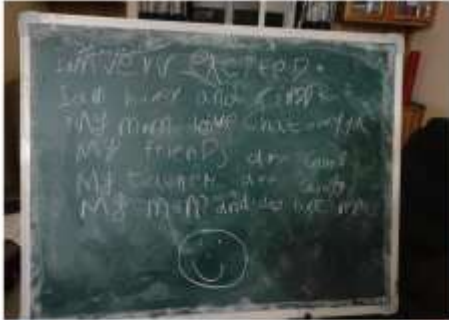

We, the care givers, have a sincere responsibility to give away our children hand skills at least one if not many. And, help them grow in those skills and save them ferociously.

Interestingly, these hand skills save us from brain deterioration and depression in our old age.

Let's start early..

Universal Language-English; National Language-Hindi; Regional Language-Telugu

Learning more languages opens doors to learning from the world.

We, in India, are blessed with the diversity of languages and have rich literature in every language.

Growth mindset we can develop in our children if they are learning and reading different literature in different languages.

Let's keep working towards it bit by bit.

Parent-Teacher-Dialogue

Do you know Diversity believes in more informal setting than formal and lets its parents reach out to their children's facilitators any day on Lil triangle, i.e., our school App for their learning and wellbeing.

Organizing such parent-teacher dialogues are more for emotional connect than professional connect.

Stay in touch with us as ever....

Saving photos and cherishing memories is the aim of this page.

Save it for your child too.....

More Memories uploaded....

Design Thinking

Design Thinking is a generic term proposed by New Education Policy 2020. Design thinking is not only thinking for making Apps or software. It is for thinking creatively in all possible areas.

Our Vividers have opportunities to think creatively for artistic expressions and to think for solving problems..

In all areas-blocks and puzzles, music, languages, geometry, science lab, culinary art, painting and drawing, Sports, and everything they do here with us.

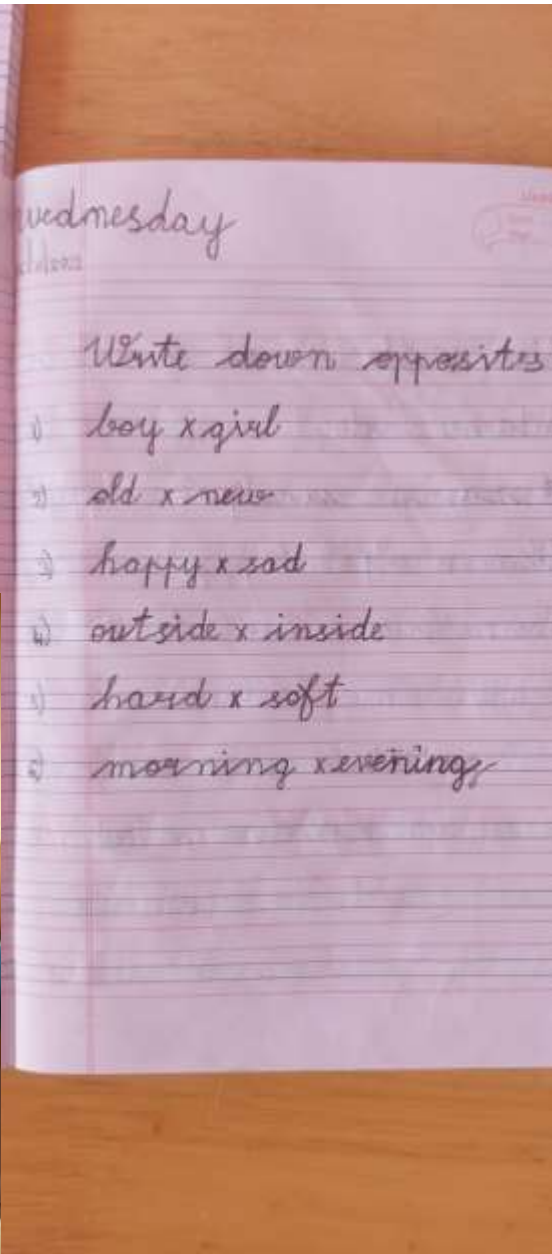

Exploring Human Potential

It always becomes quite an humbling experience when we realize that each one of us carries some potential.

We not only feel grateful for what is around us but also have opportunities to get everyone to work for children.

Thank you Rabia Aunty for becoming not only a caring helper but also for contributing towards building a skill in our Vividers.

Diversity works towards fluid thinking and working in Vividers.

Cursive Writing and Abacus methods are proven for that.

Introduced this year in Grade 1 to 3

Playing multiple games in the childhood helps a brain wire more and better. Intradisciplinary and cross-domain learning go a long way to develop better critical and creative thinking and execution skills in our child.

Albert Einstein was a great violin player along with being a noble physicist. It is said that his music sense brought a better spatial sense in him. You never know which is liberating which.

PLAY, PLAY, AND PLAY is the policy at Diversity.

Diversity is going places

Teachers empowerment workshop in SRN Mehta School in Kalaburagi, Karnataka

Our Vividers are no less than college-goers.

So many facilitators are nurturing them in so many ways:

- Creativity
- Critical Thinking
- Social Skills
- Physical Skills
- Nature and worldly concepts
- Happiness and Well being....

Let's all stay blessed.....
